

Dear Friends,

Once again, we want to tell you how grateful we are to be working with you as partners. We sincerely hope to work more closely with you in the future.

We are pleased to inform you our latest product - SD ZNC **Plus** is officially launched.

We have developed our existing model SD ZNC into a greater improvement where the new functions are added:

1. Intelligent deep hole machining is easy to set by simply entering machine current and the other machining parameters will be set automatically.
2. Capable of machining super hard alloy in irregular, spherical and curved shape.
3. Job-finish-stop device increase convenience of operation.

I have also enclosed the image of the differences between SD ZNC and SD ZNC Plus based in the appearance. Please refer to the next page for the image.

Thank you so much for reading our announcement.

Looking forward to seeing you soon! Have a happy Easter!

OSCARMAX Team
